The clinical practice of the nurse, in the context of the
 professional role, is a complex one, involving a range of
 activities and responsibilities. The nurse's role is to provide
 care and support to patients, and to work in partnership with
 other professionals to ensure the best possible outcomes for
 patients. The nurse's role is also to educate and support
 patients and their families, and to provide a safe and
 effective environment for care. The nurse's role is to
 ensure that patients are treated with dignity and respect,
 and that their needs are met. The nurse's role is to
 provide a high standard of care, and to ensure that
 patients are safe and comfortable. The nurse's role is to
 provide a range of services, including assessment,
 diagnosis, treatment, and care. The nurse's role is to
 provide a range of services, including assessment,
 diagnosis, treatment, and care.

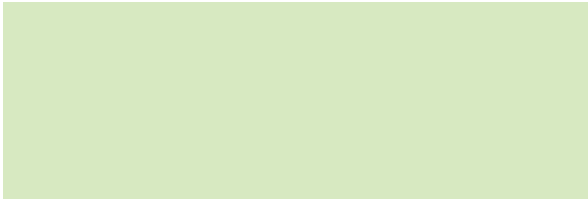

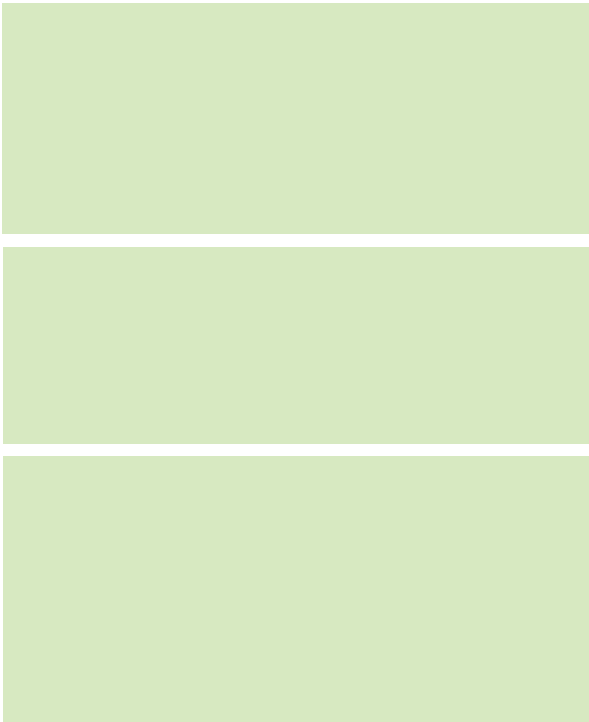

The professional role of the nurse is to provide care and
 support to patients, and to work in partnership with other
 professionals to ensure the best possible outcomes for
 patients. The nurse's role is to ensure that patients are
 treated with dignity and respect, and that their needs are
 met. The nurse's role is to provide a high standard of
 care, and to ensure that patients are safe and comfortable.
