1 Introduction

# 2 Def ning

### o Ý Ý ÿø ÿ ÿÝ ÿÝ Ý

The primary aim of menopause care is to provide women-centred  $\acute{\gamma}$   $\acute{\gamma}$  promotes health into the years beyond menopause. This is achieved by using the NICE guidelines as well as adapting and building on  $\acute{\gamma}$   $\acute{u}$   $\acute{\gamma}$   $\acute{u}$   $\acute{u}$   $\ddot{\gamma}$ 

- adopting an individualised approach at all stages of diagnosis, investigation and management
- providing information in different ways, tailored to the individual
- discussing treatment options, including an individualised risk assessment of each types and excluding contraindications
- offering treatment as appropriate, monitoring and adjusting as necessary
- adapting treatment as needed, based on a woman's changing ù ù Ý ù ù ÿ Ø ÿ ù ù and sexual differences
- taking into account fertility needs
- considering and addressing psychological needs
- seeing women at high risk of/or with breast cancer
- seeing women with other risk factors such as type 2 diabetes

Ý ÝÝ ùù

This is an important health issue for employment, including occupational health nursing. Women should be offered support and advice regarding their employment as well as their physical and mental wellbeing.

## 5 Conclusion

The NICE guidelines reference a specialist health care practitioner from any discipline and this development should be welcomed and celebrated as an attractive career opportunity for nurses. The nurse specialist in menopause represents an exciting opportunity for nurses to develop into a leadership role in a collaborative ùÝ Ýù Ý ùÝ Ý Ý ùÝ ÝΫ Ù expert advice and good menopause management to improve their ùΫ́ÿ È È (such as osteoporosis). It is being recognised as a strategic leadership opportunity for nurses who specialise in an important aspect of woman's health care.
